

# TESTIMONIAL-

I have always been deeply fascinated by the universe and curious about how real-life research takes place. While exploring opportunities, I came across a LinkedIn post from Dr. Maria about two open positions for a project. I emailed her within minutes of seeing the post, and she kindly responded right away, scheduling a meeting with Biagio.

We began the project on December 2nd, and Biagio was incredibly supportive, patient, and kind throughout. He explained everything step by step, breaking down tasks in such an efficient way that the work never felt overwhelming. We did many analysis tasks and had meetings from 7 to 9 IST, after which we worked independently. Biagio was always prompt in answering my questions on WhatsApp, which made learning so much smoother.

Dr. Maria regularly checked in through meetings to guide us and ensure we were on the right track. She also encouraged us to attend various seminars, where we learned a great deal. As the project reached its final stages, her dedication was truly inspiring—she supported us tirelessly, even when she wasn't feeling well. Her curiosity and passion for physics shone through, especially during discussions with professors, where she asked insightful questions that left a lasting impression.

I am truly grateful to have had the opportunity to learn from Dr. Maria and Biagio. Their kindness and dedication have been a source of inspiration, and I hope to continue learning from them in the future.
