

# Testimonial

I am Mudit Parakh, a second-year BS-MS student in Natural Sciences at the Indian Institute of Science Education and Research, Bhopal. I am deeply grateful to Dr. Maria Giovanna Dainotti for selecting me for the project '*A New Master Supernovae Ia Sample and the Investigation of the  $H_0$  Tension.*' This project has been an incredible learning experience, providing me with valuable insights into cosmology and the data analysis techniques essential for our research.

In addition to enhancing my technical skills, I gained a deeper understanding of the process of writing research papers, including the critical aspects to consider while preparing a scientific manuscript. The entire experience has been immensely rewarding, offering me greater clarity about my future career path.

Dr. Maria is an outstanding researcher and mentor. Her guidance and support have been instrumental in my growth, and she has taught me many crucial aspects of a research career. I am also thankful for the exciting research opportunities she has introduced me to, and I look forward to collaborating with her again in the future.

A handwritten signature in black ink, reading 'Mudit', with a horizontal line underneath it.
