

# Appreciation Letter

Working with Professor Maria has been great! I have worked with her from January 2025, I got to learn a lot and gain my first-ever research experience. All the people in her team that I worked with are really cooperative. She is quick to guide students and goes the extra mile to include students like us in the complete research environment. I worked with her for three papers; the communication was frequent and productive, and she also exposed me to further opportunities.

I'm truly grateful for her patience, encouragement, and the opportunities she has given me to grow as a researcher and learner. She is very collaborative and makes great efforts, especially in terms of finding time for research and guiding students. Working under her supervision has been one of the most valuable experiences in my academic journey. I'm grateful for this learning opportunity and inspired to continue astrophysical research!

If you're seeking a well-rounded research experience and career guidance, I highly recommend working with Professor Maria.

Best,  
Khushi Gupta
